

Please do not allow LPFM sations to take priority over current FM translator services. This would prevent hundreds of thousands of people from listening to broadcast stations such as K-LOVE (among other stations) heard on FM translators. K-LOVE (and other Christian/Family oriented radio stations) serve as a vital role in communities all over the United States as well as other countries. They provide encouragement, assistance for those who are hurting (such as their 24 hour prayer line and a line staffed by Pastors who will talk/counsel people contimplating suicide), not to mention playing music than an entire family can listen to. There's not much out there that an entire family can enjoy together. K-LOVE also provides an outlet for bringing people together to help others in need. Such as providing info on how to support great causes like world-vision which assists orphans & those suffering from aids in Africa. It would take too long to list all of the wonderful & community oriented things that K-LOVE does. In todays world, we need as many good influences as we can get. We need organizations that bring people together & join communitis rather than divide them. If LPFM is aloud to displace stations like K-LOVE, which provide this positive influence in so many communitis....you will be destroying one of the few positive outlets left in America. So, we are asking that you please reconsider any actions that would prevent K-LOVE (and other such stations with FM translators) from continuing broadcasting...from continuing the invaluable service they provide.
